

I2F MEDIA PRODUCTS

I2F MediaBox

Inter2Face manufactures **I2F MediaBox**, a *Media Control Server*. The latter is our designation for standard hardware answering to certain minimal standards for an optimal reproduction of media and a simultaneous control of diverse hardware.

I2F MediaBox exists in three practical form factors. Its value lies in the following characteristics:

- ✓ High quality components that follow closely the technological evolution. They guarantee a fast and steady performance and make sure that *real high def video* is not just hot air!
- ✓ Optional extension piece (CPE) for securing cable ends and connectors,
- ✓ Easy to fix to a wall or table in any chosen orientation.

Technical data for the standard batch 01/2010:

	microATX	miniITX	miniITX M350
	(W 335 x D 255 x H 91 mm)	(W 275 x D 188 x H 75 mm)	(W 190 x D 220 x H 60 mm)
Motherboard	Intel Desktop Board DP55WB Media Series	Intel Desktop Board DH57JG Intel Media	Intel Desktop Board DH57JG Intel Media
Processor	Boxed Intel® Core i3-530 Desktop Processor		
HD	Intel X25-V Value SATA Solid-State Drive		
Internal memory	Kingston Valueram memory 4GB 1333MHz DDR3 Non-ECC CL9 DIMM		
Power supply	HEC-300FE-2RX 300 Watt high efficiency power supply integrated	Seasonic SS-250SU APFC F0 integrated	M350 picoPSU-150-XT + 102W Adapter Power Kit external
5 Volt and 12 Volt available for peripherals through Phoenix connector			
Options	Diverse i/o breakouts such as DMX, serial connections...		
	CPE (Cable protection extension): D 82 mm		

Ask information on I2F MediaBox miniITX «light », meant for less demanding applications.

I2F MediaBox is designed to operate 365 days a year in an unmanned way. We supply it completely with hard- and software according to your needs and budget, if desired with a pre-programmed media presentation.
